

Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211.

☒ All GE foods should be labeled so I am informed and have a choice.

GE foods should not be assumed to be "generally recognized as safe" and should require mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

DPT was originally thought to be harmless. So were cigarettes, so was lead in gasoline. We can check GE effects now or pay the consequences later.
